ProTech Introduction
• Tape Technology for Gas-Phase Samples
• Manufactured In & Supported From Calgary, AB
• Backed by 40 Years of Experience in Natural Gas

Rapid Return-On-Investment
• Never Miss Unexpected Upset
• Guaranteed Contractual Compliance
• Ensure Product Quality Specifications

Measurement Certainty
• 0.005 ppm LDL Every 3 Minutes
• Predictive Alarm in ≤ 20 Seconds
• 10 Months Data Logging Storage
• Multi-Stream Up to 4 Channels
• CSA Div. 1; ATEX / IECEx Zone 1

Key Applications
• Polymer Production
• Pesticides Manufacturing
• Polyurethane Toluene Diisocyanate Synthesis

On-Board Calibration
• Phosgene Bottled Cal Gas Not Easily Available
• Permeation Tube Device Eliminates Gas Cylinders
• Mounted Near Analyzer in Climate-Controlled Box

ProTech903™ D1 / CE
Tape Analyzer for Phosgene
ProTech903™ D1 / CE
Tape Analyzer for Phosgene

Extended-Life Tape With No Interferences

Convenient Permeation Tube Calibration

Large Local Display With LED Indicators

Secure Remote Access With Advanced Diagnostics
